CBA Style Markerboard Specification

CBA style markerboards shall be constructed of 28 gauge porcelain enamel steel writing surface laminated to 7/16" MDF and backed with a .005" aluminum moisture barrier. CBA markerboards shall be framed with .1250" aluminum extrusion with a 1" face. All corners shall be mitered and closed to a hairline joint. Standard ribbed chalktray with rounded corners shall be provided.

Markerboards exceeding 4' x 12' in size will be provided in multiple panels. Multiple panel boards can be manufactured with 1/2" aluminum anodized joint strip, a white powdercoated 1/2" aluminum anodized joint strip, or a concealed splined joint between panels.

Optional:

Display rail 1" or 2" with cork insert end stops and map hooks mounted at the top of each board.

Flag holders
